PROFESSIONAL SUMMARY

Java backend developer with production experience on a multi-tenant enterprise CRM platform. Delivered REST services end to end on JAX-RS, Hibernate and PostgreSQL, instrumented audit logging across 15+ modules, and resolved production defects diagnosed from live stack traces. Also builds full-stack applications with Spring Boot and React. Currently pursuing an MCA at VJTI, Mumbai.

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript (ES6+), HTML5, CSS3

Backend: Spring Boot, Spring Security, JAX-RS (Jersey), REST APIs, Hibernate, JPA, JWT Authentication

Frontend: React 19, React Router, Zustand, Tailwind CSS, Bootstrap

Databases & Practices: PostgreSQL, MySQL, Relational Schema Design (ERD), Query Optimization, Indexing, Layered Architecture, Debugging & Root-Cause Analysis, Agile Delivery

Tools & Platforms: Git, GitHub, SVN, Apache Ant, Maven, Apache Tomcat, Postman, Eclipse, VS Code, AWS (EC2, S3)

PROFESSIONAL EXPERIENCE

Java Developer | Technopurple, Mumbai | May 2026 – Aug 2026

Enterprise multi-tenant CRM and field-service platform — Spring-free Java EE stack (JAX-RS, Hibernate, PostgreSQL, Tomcat, SVN, Ant), team workflow with peer code review.

- Designed and shipped multiple REST services from scratch, including a resource-type permission service using JSONB-backed entities with per-user upsert semantics, a dynamic custom-field API, and a pre-filled form endpoint sourcing media from AWS S3.
- Instrumented audit and transaction logging across 15+ services covering create, update, delete and assignment flows, capturing pre-mutation state snapshots to give clients a readable change history.
- Diagnosed and fixed production defects from live stack traces, including Hibernate LazyInitializationException on lazily loaded proxies (resolved with eager fetch joins), null-pointer failures caused by incorrect session-context resolution, and Apache POI cell-style exhaustion on large Excel exports.
- Optimized high-traffic query paths by replacing per-iteration queries with a single native SQL fetch, removing redundant joins from a heavily used endpoint, and adding a targeted PostgreSQL index for a read-tracking feature.
- Built a note read-receipt subsystem of five REST endpoints with upsert logic, coordinating the API contract directly with the frontend team.
- Audited Excel upload, validation and template-generation logic across services, fixing header-parsing bugs that were blocking client data uploads in production.

PROJECTS

CompatX - E-Commerce Platform | Spring Boot, React, MySQL, Stripe/Razorpay | [GitHub Repo](#) | [Live](#) | Oct 2025 – Dec 2025

- Built a production-grade e-commerce application supporting 100+ products, with a RESTful Spring Boot backend in layered architecture (Controllers, Services, Repositories, DTOs) using JWT authentication, refresh tokens and role-based access control.
- Integrated Stripe Checkout and Razorpay with server-side signature validation, strict CORS policies, request validation and centralized exception handling.
- Designed the complete relational schema (ERD) and JPA/Hibernate entity model; built an admin dashboard for product CRUD, inventory, categories, order lifecycle and real-time analytics.
- Developed a responsive React 19 frontend using Tailwind CSS, React Router v7 and Zustand for state management.

Portfolio Website | React, Tailwind CSS, Vercel | [GitHub Repo](#) | [Live](#) | Jun 2025 – Jul 2025

- Designed and deployed a mobile-first personal portfolio with reusable React components and HTTPS-enabled Vercel deployment; also built a pixel-accurate responsive YouTube homepage clone using semantic HTML5, Flexbox and CSS Grid (May 2025).

EDUCATION

Master of Computer Applications (MCA) | Veermata Jijabai Technological Institute (VJTI), Mumbai | Sep 2026 – Present

B.Sc. Computer Science | D. G. Ruparel College, Mumbai | Jun 2022 – May 2025 | CGPA: 7.98 / 10

CERTIFICATIONS & ACHIEVEMENTS

- Won 2nd place at ThunderByte Hackathon 2025, leading the team and delivering the final presentation solo.
- Certifications: SQL (Intermediate) — HackerRank; Java Full Stack Development, DevOps and Web3 Fundamentals — IT Vedant (2025).
